

Seems to me liberty area is forever upgrading its water and sewers plants and lines, never getting it right.

I'm tired of paying for others sewerage and water. I'm sick of construction destroying our country atmosphere for summer residents. I thought the casino was going to help pay for things and so far it's done nothing.

I think it's time for all those in charge to wake up to reality unemployment is high liberties taxes are highest in the county and we don't need more houses that are not filled with people living there and permanent residence paying for things stop living in Disneyland and wake up to reality we live here we need help not the new construction people let them pay for it
